Subject: Application - Electrical and Automation Technician

Dear Hiring Team at CERN,

With over 15 years of experience in business development and a strong background in project management, I am excited to apply for the Electrical and Automation Technician position at CERN. My technical expertise and adaptability to fast-paced environments align well with the demands of this role.

I possess a proven track record in system administration, particularly with Linux operating systems and container technologies like Docker and Kubernetes. My skills in strategic planning and stakeholder engagement will be invaluable in contributing to the success of CERN's controls software and infrastructure.

In my previous roles, I successfully managed the integration of new technologies into project workflows, enhancing operational efficiency and ensuring high availability of services. My experience in negotiating and problem-solving has equipped me to address complex challenges effectively.

I am available for an interview at your earliest convenience and am open to relocating to Geneva for this opportunity. Thank you for considering my application.

Kind regards,

Juan-Bernardo Rivero
