Subject: Application - Geneva Internship Program

Dear Hiring Team at IISD,

I am a results-driven investment analyst with over 10 years of experience across various industries, particularly in the startup ecosystem. My keen interest in sustainable development aligns perfectly with the goals of the IISD, and I am eager to contribute to your impactful projects.

I possess strong skills in financial valuation, due diligence, and strategic negotiation. My ability to analyze complex data and develop actionable insights will be beneficial in supporting IISD's initiatives in economic policy and sustainable resource management.

In my previous roles, I successfully led projects that required meticulous financial modeling and analysis, resulting in improved investment strategies and enhanced decision-making processes. My adaptability to multicultural environments and fluency in English, French, and Spanish further equip me to thrive in the diverse setting at IISD.

I am available for the internship from January to April 2026 and am flexible with working hours to accommodate the needs of the program. I look forward to the opportunity to contribute to IISD's mission and to learn from your esteemed team.

Kind regards,

Juan-Bernardo Rivero
