**Subject: Application - Directeur des données**

Dear Hiring Team at Lombard Odier,

With over 15 years of experience in business development and a strong background in data governance and project management, I am excited to apply for the Directeur des données position at Lombard Odier. My expertise in integrating new technologies and leading cross-functional teams aligns perfectly with the innovative environment you foster.

I possess advanced skills in data governance, stakeholder engagement, and strategic planning. My trilingual capabilities (English, French, Spanish) enhance my ability to communicate effectively in diverse settings, ensuring clarity and collaboration across teams.

In my previous role, I successfully led a team in implementing a data integration strategy that improved data quality and compliance with regulatory standards. This initiative not only streamlined operations but also empowered business users through enhanced data analytics tools, resulting in a 30% increase in decision-making efficiency.

I am available for an interview at your earliest convenience and am willing to relocate to Switzerland if necessary. I look forward to the opportunity to contribute to Lombard Odier's mission of innovation and excellence.

Kind regards,

Juan-Bernardo Rivero
