Subject: Application - Senior Blockchain Developer

Dear Hiring Team at FINDERS SA,

I am a results-driven business professional with over 10 years of experience and a keen interest in blockchain technologies and decentralized finance. My background in investment analysis and entrepreneurship has equipped me with the analytical skills necessary to excel in the fast-paced environment at FINDERS SA.

I possess advanced proficiency in Solidity and smart contract security, alongside strong problem-solving skills. My experience includes designing and developing scalable blockchain architectures, as well as applying rigorous testing methodologies to ensure the robustness of smart contracts.

In my previous roles, I have successfully led multidisciplinary teams in the development of complex codebases, ensuring high standards of code quality and security. My ability to thrive in dynamic environments and my strong communication skills in English and French have allowed me to effectively collaborate with diverse teams.

I am available for an interview at your earliest convenience and am open to discussing relocation or travel as needed. I look forward to the opportunity to contribute to the innovative projects at FINDERS SA.

In practice, that means I work on the work with attention to clarity. I prefer concrete steps — defining the scope, setting a simple plan, and adjusting based on feedback. I keep it readable: short updates, a clear call-to-action, and timelines people can accept. Kind regards,

Juan-Bernardo Rivero
